Triads Future

Information Architecture & User Journey

Version: 1.0

Status: Locked

Purpose

This document defines the structure of the website, the relationship between pages, navigation hierarchy, and the intended user journey.

The objective is to ensure every page contributes to a clear business goal and that visitors naturally progress toward booking a Strategy Call.

Navigation Principles

- Keep navigation simple.
- Maximum six primary items.
- Sticky navigation on desktop.
- Optimized navigation for mobile.
- Contact is always the primary call-to-action.

Website Goal

The website has one primary objective.

Visitor

↓

Trust

↓

Conversation

↓

Strategy Call

Everything supports this journey.

Visitor Entry Points

Visitors may arrive from:

- Google Search
- Social Media
- LinkedIn
- Direct URL
- Referral
- QR Code
- Business Card
- Paid Advertisement

Every page should therefore work as an entry point, not only the homepage.

Strategy Call

Page Responsibilities

Home

Purpose

Introduce the company.

Establish credibility.

Guide visitors toward deeper exploration.

Primary Goal

Continue browsing.

Secondary Goal

Book Strategy Call.

Solutions

Purpose

Present business solutions rather than individual services.

Primary Goal

Help visitors understand how Triads Future solves business challenges.

Secondary Goal

Encourage consultation.

Work

Purpose

Demonstrate business impact through case studies.

Primary Goal

Build trust.

Secondary Goal

Generate confidence.

Insights

Purpose

Position Triads Future as a business authority.

Primary Goal

Educate visitors.

Secondary Goal

Improve SEO.

About

Purpose

Build confidence in the people behind the business.

Primary Goal

Communicate long-term partnership.

Secondary Goal

Increase trust.

Contact

Purpose

Convert visitors into conversations.

Primary Goal

Book a Strategy Call.

CTA Strategy

Every page has one primary action.

Page	Primary CTA
Home	Book a Strategy Call
Solutions	Discuss Your Business
Work	Start Your Project
Insights	Let's Talk
About	Build With Us
Contact	Book a Strategy Call

Secondary CTAs should never compete with the primary objective.

Internal Linking Strategy

Every page should naturally lead to another.

Related Solution

Contact

This improves both usability and SEO.

Footer Strategy

The footer is not simply navigation.

It serves as the website's final opportunity to reinforce trust.

Footer Includes

- Quick Links
 - Contact Details
 - Social Links
 - FAQ
 - Small Brand Statement
 - Copyright
-

Search Engine Structure

Primary SEO Pages

- Solutions
- Work
- Insights
- About
- Contact

Content Expansion

Insights articles become long-term SEO assets.

Each article should link to:

- Relevant Solutions
- Relevant Work
- Contact Page

User Experience Flow

|— Work

Every path eventually leads to the Contact page.

Mobile Information Architecture

The navigation hierarchy remains identical.

However, the presentation should be optimized for mobile behavior.

Principles

- Fewer interactions.
- Faster access.
- Clear CTAs.
- Reduced scrolling where possible.
- Purpose-built layouts rather than compressed desktop sections.

Desktop Information Architecture

Desktop should use available screen space to:

- Improve readability.
- Increase visual hierarchy.
- Showcase business credibility.
- Present richer layouts.

Desktop should never feel empty.

Future Expansion

The architecture should support future additions without restructuring.

Possible future pages

- Careers
- Case Studies
- Resources
- Events
- Client Portal
- Growth Analytics
- CRM Dashboard

The navigation should remain flexible enough to accommodate growth.

Information Architecture Principles

- Keep navigation shallow.
 - Minimize unnecessary clicks.
 - Every page has one purpose.
 - Every journey leads toward conversation.
 - Visitors should never feel lost.
 - Navigation should support business goals rather than organizational structure.
-

Success Criteria

A successful information architecture allows visitors to:

- Understand where they are.
- Know what to do next.
- Reach any important page quickly.
- Move naturally toward booking a Strategy Call.
- Explore content without confusion.
