

15 - Version 1 Scope

Triads Future

Version 1 Scope & Deliverables

Version: 1.0

Status: Locked

Purpose

This document defines the official scope of Version 1 of the Triads Future website.

It establishes what will be delivered, what is intentionally excluded, and the acceptance criteria for the initial release.

This document serves as the primary reference for project scope and helps prevent scope creep during development.

Project Objective

Version 1 aims to deliver a premium, responsive, CMS-driven business website that positions Triads Future as a trusted Business Growth & Technology Partner.

The objective is to launch a polished and maintainable product that provides immediate business value while establishing a scalable foundation for future enhancements.

Included Deliverables

Public Website

The following pages are included:

- Home
- Solutions
- Work

- Insights
- About
- Contact

Footer includes:

- FAQ
 - Quick Navigation
 - Contact Information
 - Social Links
 - Copyright
-

Home Page

 - Strategy Call CTA
-

Contact

Includes:

- Strategy Call Booking
 - Contact Information
 - Business Hours
 - FAQ
 - Appointment Workflow
-

Responsive Design

Version 1 includes optimized experiences for:

- Desktop
- Tablet
- Mobile

Each breakpoint is intentionally designed rather than simply resized.

CMS

Version 1 includes:

- Dashboard
 - Appointments
 - Portfolio Management
 - Blog Management
 - Testimonial Management
 - FAQ Management
 - Media Library
 - Website Settings
 - Administrator Profile
-

Core Functionality

Included:

- Secure Administrator Login
 - CRUD Operations
 - Media Upload
 - SEO Metadata
 - Responsive Navigation
 - Search Engine Optimization
 - Contact Appointment Management
-

Technical Deliverables

- Next.js Application
- PostgreSQL Database

- Prisma ORM
 - Responsive UI
 - Secure Authentication
 - Production Ready Codebase
-

Performance Targets

The website should:

- Load quickly
 - Be fully responsive
 - Follow accessibility best practices
 - Follow SEO best practices
 - Maintain clean and scalable code
-

Content Management

Administrators can manage:

- Projects
- Blog Posts
- Testimonials
- FAQs
- Website Settings
- Media

No developer should be required for routine content updates.

Not Included

The following features are intentionally excluded from Version 1:

- Growth Analytics Dashboard
- Google Analytics Integration
- Search Console Integration
- CRM
- Email Marketing
- WhatsApp Automation
- Proposal Generator
- Team Roles & Permissions
- Client Portal

- Live Chat
- Newsletter Automation
- AI Business Insights
- Activity Logs
- Calendar Scheduling
- Payment Integration
- Multi-language Support

These features remain part of the future product roadmap.

Future Roadmap

Possible Version 2 enhancements include:

- Business Analytics
 - CRM
 - AI Insights
 - Marketing Automation
 - Proposal Builder
 - User Roles
 - Client Portal
 - Email Campaigns
 - Activity Logs
 - Integrations with Third-party Services
-

Acceptance Criteria

Version 1 is considered complete when:

- All approved pages are implemented.
 - CMS modules function correctly.
 - Responsive layouts are verified.
 - Content can be managed through the CMS.
 - Appointment workflow functions correctly.
 - SEO foundation is complete.
 - Accessibility standards are met.
 - Final testing is completed.
 - Production deployment is successful.
-

Scope Control

Any feature not listed in this document is considered outside the Version 1 scope.

New feature requests should be documented for future releases rather than added during active development.

Version 1 Success Criteria

Version 1 is successful if:

- Visitors clearly understand the Triads Future brand.
 - The website builds trust and credibility.
 - Visitors are encouraged to book a Strategy Call.
 - The CMS enables easy content management.
 - The platform provides a solid foundation for future growth.
-

Final Principle

Version 1 is not intended to be the final product.

It is the first production-ready release of a long-term digital platform.

Success is measured by delivering a high-quality product on time, maintaining code quality, and creating a scalable foundation for future development rather than attempting to implement every possible feature in the initial release.
